Syed Rafiul Kabir

Software Engineer

Dhaka, Bangladesh — rafiulkabir01.rucse@gmail.com — +880 1959776747

SyedRafiulKabir — syedrafiulkabir — syedrafiulkabir.github.io

Professional Summary

Software Engineer with 3+ years of experience building scalable backend systems, enterprise CMS platforms, and integrations in the .NET ecosystem. AI-enabled practitioner specializing in context-driven and spec-driven development—leveraging structured specifications, deep codebase context, and AI-assisted workflows to accelerate delivery without compromising architectural rigor. Proficient in ASP.NET Core, EPiServer/Optimizely CMS, nopCommerce, SQL Server, and complex third-party integrations (OAuth2, OData, REST) within Agile environments.

Technical Skills

Backend: C#, ASP.NET Core, ASP.NET MVC, Web API, REST APIs

CMS & E-commerce: EPiServer/Optimizely CMS 11, nopCommerce, Elasticsearch

Frontend: Angular, AngularJS, React, Razor, Kendo UI, jQuery, HTML5, CSS3

Data & Reporting: MS SQL Server, OracleDB, Entity Framework, LINQ, FluentMigrator, RDLC Reports, Query Optimization

Integrations & Cloud: Xero (OAuth2), OData, Wolt API, Azure App Service, Azure DevOps CI/CD, Git, GitLab

AI-Enabled Engineering: Spec-Driven Development (SDD), Context-Driven Workflows, AI-Assisted Architecture & Code Gen, Prompt Engineering

Architecture & Practices: Clean Architecture, SOLID, OOP, Repository Pattern, Agile, Code Reviews, Unit Testing

Professional Experience

Software Engineer I — *Oct 2025 – Present*
Brain Station 23 PLC — *Dhaka, Bangladesh*

- Champion **context-driven and spec-driven AI workflows**, defining architectural specs and structured context to accelerate feature scaffolding, code reviews, and integration delivery with high precision.
- Deliver backend features on an enterprise **EPiServer/Optimizely CMS 11** platform, including certification integrations, access gating, accessibility enhancements, and async API endpoints.
- Develop high-performance plugins for **nopCommerce (4.60–4.90)** powering enterprise e-commerce platforms.
- Design and implement integrations with **Xero Accounting (OAuth2)**, **Wolt Delivery APIs**, and ERP platforms via **OData services**.
- Improve data processing performance with **batch processing pipelines** and optimized SQL queries; architect modular UI and backend extensions using custom model factories and view location expanders.
- Maintain CI/CD pipelines in **Azure DevOps** and ensure stability across Azure App Service deployments.

Junior Software Engineer — *May 2025 – Sep 2025*
MultiTech Systems — *Dhaka, Bangladesh*

- Developed HR and Payroll modules for an ERP system using ASP.NET MVC and AngularJS.
- Built **RDLC reports** over Oracle DB for workforce and financial data.
- Optimized SQL queries and API processing to improve backend performance.
- Implemented error-handling and fail-safe mechanisms to improve system stability.

Junior Software Engineer — *Jun 2024 – Apr 2025*
Global Software Architects — *Dhaka, Bangladesh*

- Developed intelligent vehicle tracking applications integrating **OpenAI APIs**.
- Improved security and performance of FinTech modules used for financial data processing.
- Refactored legacy modules using .NET Core and Angular to enhance scalability and maintainability.

Junior Software Engineer *(Intern, Oct–Dec 2023)* — *Oct 2023 – May 2024*
BizzNtek Ltd. — *Dhaka, Bangladesh*

- Contributed to the CRM module of a .NET Core hotel management system.
- Investigated and fixed defects in existing features, improving stability.

Education

University of Rajshahi *Jan 2018 – Oct 2023*
B.Sc. Engg. in Computer Science and Engineering
CGPA: 3.04 / 4.00

Projects

IIA Web Platform — EPiServer/Optimizely CMS 11 *Brain Station 23*
Tech: C#, ASP.NET MVC, EPiServer/Optimizely CMS 11, MS SQL Server, Entity Framework, FluentMigrator, Azure App Service, Azure DevOps, REST APIs, Razor, jQuery, HTML5, CSS3

- Built backend features for the Institute of Internal Auditors' enterprise CMS, including certification integrations and access-control gating.
- Delivered accessibility fixes and async API endpoints; integrated third-party APIs using C#, SQL Server, and Azure.
- Resolved Azure DevOps CI/CD failures and kept code quality consistent within an Agile team.

Intelisale — nopCommerce Integration *Brain Station 23*
Tech: ASP.NET Core, MVC (Razor), MS SQL Server, nopCommerce

- Engineered an integration between the Intelisale omnichannel platform and nopCommerce to digitalize B2B sales processes, reflecting real-time inventory, logistics, and personalized shipping logic.
- Re-engineered core services to run complex background calculations without affecting user experience.
- Developed adaptive logic to resolve discrepancies in real-time data delivery and improve data reliability and latency.

Action Website — nopCommerce E-commerce *Brain Station 23*
Tech: ASP.NET Core, MS SQL Server, Razor, MVC, Xero OAuth2, Schneider API, Elasticsearch

- Implemented the Xero OAuth2 flow with database token persistence and dynamic "Connect" state in the admin panel.
- Integrated Elasticsearch to replace default search, with a scheduled task for bulk product updates.
- Built a Schneider Product Sync scheduler for bulk API fetching and automated category/specification mapping.
- Delivered a Monthly Order Report with automated customer identification and personalized email delivery; wrote SQL migration scripts to move legacy category and attribute data to production.

AmTab — Design Resource Platform *Brain Station 23*
Tech: ASP.NET Core, MS SQL Server, Razor, MVC

- Resolved architectural bottlenecks in custom modules and rendering engines to improve system stability.
- Architected a scalable plugin workflow for adding new design resources without disrupting core logic.
- Refined dependency management for reliable cross-layer data flow and optimized the rendering pipeline for data-heavy design assets.

Multitex ERP — HR & Payroll Module *MultiTech Systems*
Tech: ASP.NET MVC, AngularJS, Oracle DB, RDLC

- Developed the HR and Payroll module for an ERP serving the apparel and manufacturing industry, reducing manual processing time by an estimated $\sim$35%.
- Built RDLC reports and Oracle DB data-retrieval workflows aggregating large datasets for enterprise reporting.
- Engineered payroll and attendance logic covering multi-shift calculations and statutory compliance, and optimized queries for real-time report generation over historical data.
